## **DETAILED ACTION**

## Information Disclosure Statement

Applicant's application papers filed on 1-29-2004 seems to indicate that applicant filed a electronic IDS, however the patent office has no record of the contents of that paper. Applicant should recheck his records and if he did file such an ids, resubmit the paper work along with a copy of the original return postcard indicating receipt by the office.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Feingold USPN 4,233,987. Feingold shows in figure 4 four separable articulated electrodes. The examiner considers the top two electrodes to be one support member paddle, and the bottom two to be a second support member paddle. Each of the support member paddles has two contacts 22 and at least one lead (23) carried by the support member and connected to at least one of the contact members. The two paddles are coupled by a perforated coupling member.
